

WATER METER LOCATIONS

Water meters shall be installed inside the building or dwelling within the same room as, and within 5-8 feet of, the water service entry. Each meter shall have its own outside shut-off valve. Meters shall be located so as not to be subject to freezing and to be accessible for reading or maintaining at all times. A valve shall be located on each side of the meter. All water meters will be installed with an electronic readout. It is recommended that water meters be located in an area with a floor drain.

UNACCEPTABLE Water meter locations are listed below:

Crawl spaces
Under stair landings
In garages
Behind furnaces and water heaters
In back of closets and storage spaces
In or behind cabinets or paneling
Other inaccessible locations

METER SETS

The customer shall contact the City Water Billing Office (989) 837-3341 at least 24 hours in advance to schedule a meter set. The meter yoke **must** be in place prior to scheduling the meter set.
