

### **3. “Where did the special assessment money go?”**

The special assessments for WD#3 were made in 2006 and 2008. They were divided between 2006 assessments for a small number Larkin properties that were served or connected to water mains shared by Mills Township and Larkin Township on Sturgeon and Bombay Roads (“WD#3-A”). These were installed by Mills Township during the assessment process for the larger WD#3. Between the initial assessments for WD#3A and the 2008 assessment of the greater WD#3, the WD#3-A assessments were collected and placed in the WD#3 Township account. Disbursements were made to Mills Township for a portion of shared water main expenses with Mills Township.

The special assessments on the greater WD#3 properties were made on February 12, 2008 and were payable without interest until March 31, 2008. The first installment on assessments which were not pre-paid before preparation of the tax billings for December 1, 2008 were included in those bills. All special assessment proceeds were maintained in the WD#3 account by the Township Treasurer and the receipts and disbursements of that account are available for inspection at the Township Offices. From this account, the Township made its payments to the County on the Bonds.
